Preliminary Assessment of  
Potential Asbestos Waste Site

Recommendation for No Further Action

TECH SECTION

To: Paul Doherty, RPO Site Name: Comdaco, Inc.  
From: Otavio R. C. Silva, E & E/FIT Street: 3161 Wyandotte Street  
Thru: John Caoile, FITOM City: Kansas City County: Jackson  
Date: November 3, 1987 State: Missouri Zip: 64111  
Current Owner/Operator: C. Donald Comley Telephone No.: 816 756-0722  
TDD = F-07-8708-40 PAN = FMO0267PA Superfund Contact: Gene Gunn  
EPA Site # X11 Project # 001  
Dates of Operation: From 1963 To Present  
Asbestos Waste Generated: Yes ☒ No ☐ Dates: From 1963  
To 1983 or 1984  
Site Location: Agricultural ☐ Residential ☐  
Commercial ☐ Industrial ☒  
Waste Management Process (describe):  
Waste material swept off of floor and put into trash dumpster without bagging.  
Trash and waste picked up by Waste Management, Inc. of Kansas City, Mo. Disposal  
site is unknown to date.  
Site Reconnaissance: Yes ☒ No ☐ Dates: October 29, 1987  
Site History/Description:  
In the past, gaskets were cut from sheets of rubber which contained asbestos. The  
possibility for an asbestos air release existed during the process. Scraps and  
debris were generated as waste material. Process of using asbestos in gaskets was  
discontinued three or four years ago as other materials replaced asbestos.  
Justification for No Further Action:
